Guaranteeing 6 transferrable embryos. If more than 6 embryos are produced in a single flush, the buyer will be given the option to purchase the additional embryos at a prorated portion of the original sale price.

Big boned, Stout, Strong top line, Long and Deep bodied, loaded with performance and still carries the look and eye appeal from her show days. Just a few of the adjectives that describe this Donor Cow. TJR MS SHOWSTOPPER 504/U was very competitive in the show ring making it to the top at every show we entered her in. She was Senior Calf Champion at the San Antonio Livestock Show in 2010 before putting her in the pasture to do her job. Her offspring have continued to follow in her footsteps. TJR MS Showstopper 504/Z1 was

Reserve Champion Female at the 2014 San Antonio Livestock Show. Though 504/U is a young donor, we expect her to be at the top of the Red Brangus breed in the near future. Flush will be performed by Trent Wilson at Advanced Genetic Services, Inc. Buyer is responsible for all flush expenses. Selling flush on a "Per Embryo Basis". Buyer to choose herd sire mating from the Triple J-R Cattle Company battery of bulls or sire of their choice.
