SANTA GERTRUDIS & BRANGUS  
BULL & COMMERCIAL FEMALE SALE

NOVEMBER 12, 2021

BRIGGS RANCHES | TRAYLOR DIVISION | BLOOMINGTON, TX

44<sup>TH</sup> ANNUAL TRI-STAR SALE

REGISTERED SANTA GERTRUDIS FEMALE SALE

NOVEMBER 13, 2021

BRIGGS RANCHES | TRAYLOR DIVISION | BLOOMINGTON, TX

# Howdy

Thank you for showing interest in our operation and our cattle at Briggs Ranches. To let you know a little about Briggs is that we ranch along the Gulf Coast, and down to the Rio Grande, and across to the brush country of South Texas. With that said, our cattle have to be able to sustain themselves across three different terrains and environments in some cases because of storms, droughts and other natural occurrences that we are faced with annually. On that note we really pride ourselves on the comments from our buyers saying how well our cattle held up. Yes our cattle might not be the fattest or the prettiest, but THEY HOLD UP!

All of the bulls and most of the females have 100% of their weights and ultrasound measures done along with a full DNA panel taken and utilized in their personal genetic evaluation. With that said, years of comparative data gives us accuracy in telling you as our customer that our EPD will breed true to what they say they are. They will never be 100% accurate but they are the best tool we have to use in selection of BEEF cattle.

Thank you to our guest and partners Harris Riverbend Farms, Corparron Acres, Pinnacle Cattle Company, and Salacoa Valley Farms for consigning a great set of bulls, commercial females and registered females. It makes it easier with great cattle partners. These operations share in our vision to produce the best and we think you will agree when you see what they brought you.

Lastly, when you buy a bull or female from Briggs Ranch, please know that he or she did not get where they are through a feed bucket. Our cattle are developed on grass with supplement feed. We feel this is the best development method for you as our buyer to know that the bull or female you take home is going to last and do their job!

Thanks Again,

*Joe Jones*

General Manager  
Briggs Ranches  
361.550.0994

X B

## *Sale Schedule:*

### **Thursday, November 11th**

4:00 PM - Cattle available for viewing

### **Friday, November 12th**

7:00 AM - Cowboy coffee & cattle available for viewing

11:00 AM - Briggs Ranches Bull Sale (followed by Commercial Female Sale)

6:00 PM - TriStar evening dinner & social

### **Saturday, November 13th**

7:00 AM - Cowboy coffee & cattle available for viewing

11:00 AM - 44th Annual Tri Star Santa Gertrudis Sale

# 18<sup>th</sup> Annual SANTA GERTRUDIS BULL & COMMERCIAL FEMALE SALE

### Sight Unseen Purchase Option:

If you are unable to attend the auction in person or watch DVAuctions internet broadcast, simply contact the AMS marketing team:

- Describe your selection criteria and the type of bull(s) and/or female(s) you wish to purchase and your price range.
- You pay only the bid price, just as if you were bidding in person.
- We will call after the sale to confirm your purchase and you can confirm your payment method and arrange shipping.
- You decide if the animal meets your criteria upon delivery. If you are not happy with your purchase, you don't own it.

### Videos of sale cattle are available at:

www.idealvideoproductions.com & www.amscattle.com

# Santa Gertrudis Genetics

On behalf of Santa Gertrudis Breeders International, welcome to the Briggs Ranches Bull and Commercial Female Sale and the TriStar Female Sale. Santa Gertrudis selection decisions can be made with confidence, SGBI's genetic evaluation is one of the most comprehensive among the Bos indicus breeds. The evaluation system, developed for the association by Livestock Genetic Services, has been reviewed by the nation's leading animal geneticists and is built on thousands of phenotypes, scan records, and genotypes ensuring sound selection decisions can be made, identifying those animals that will perform in the most challenging of environmental conditions.

Webb Fields  
Executive Director  
Santa Gertrudis Breeders International

John Genho  
President  
Livestock Genetic Services

## SGBI's Expected Progeny Differences

Expected Progeny Differences, EPDs, are the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the SGBI database. EPDs are expressed in units of measure (plus or minus) for each trait being evaluated and are calculated utilizing pedigree and performance information. SGBI is a leader in the adoption and implementation of cutting-edge genetic technology. In 2013, SGBI released the first genomic-enhanced expected progeny differences (DNA verified) for Bos indicus-influenced cattle. The inclusion of DNA into the breed's EPD calculations (GE-EPDs) has resulted in information that is more accurate and predictable than a pedigree and performance prediction alone. Currently, the association's database contains more than 8,000 performance verifying DNA samples. In addition, to being the first Bos indicus-influenced breed to offer GE-EPDs, SGBI was the first beef breed to implement single-step methodology for the incorporation of genetic information into the genetic evaluation. This approach maximizes use of data reported on all animals throughout the pedigree and greatly improves the EPD accuracy.

## SGBI's Indices

SGBI offers two selection indices for commercial cattleman use. Indices are multi-trait selection tools designed to assist commercial producers by adding simplicity to genetic selection decisions. Indices provide an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and the calves were exposed to the same environment. SGBI's indices provide performance insight to producers marketing yearlings by the pound (\$ Growth) or retaining ownership through the feedyard (Carcass Rank).

**\$ Growth Index** - The growth index puts together weaning weight and yearling weight. Since WW is contained in YW, post-wean gain (PWG) is used in the index to prevent double counting WW. As an example of the index, if an animal has a +30-growth index, its offspring will be on average worth \$30 more as a yearling than the breed average, based strictly on weight. Please note, the \$ Growth index put zero economic weight on maternal traits and utilizing the index as a replacement female selection tool might result in larger mature weight cows.

**Carcass Rank** - The carcass rank index contains marbling score, hot carcass weight, ribeye area, backfat and tenderness, and is weighted by the economics of carcass values. It is expressed as a numerical ranking within the breed from 1 to 10, with 10 being the highest. For example, an animal with a score of 9 would be in the 80th percentile or would be better than 80% of the population in carcass composition. A ranking of 6 would place the animal in the 50th percentile. Carcass Rank Index places strong emphasis on growth and carcass traits. Utilizing Carcass Rank as a seedstock selection tool might result in increased growth while negatively impacting marbling. Seedstock producers focused on improved carcass quality are encouraged to utilize SGBI's Marbling EPD in the decision-making process. Breeding cattle with higher marbling EPDs should produce slaughter progeny with a higher degree of IMF and therefore higher quality grades.

2021 Briggs  
& Tristar Sale  
*Thank you for joining us  
again this year!*

# 2021 Sale

## Terms & Conditions

### **Bidding**

Each animal will be sold to the highest bidder without reserve. The auctioneer will settle any disputes as to bids and his decision on such matters shall be final.

### **Terms**

Each animal becomes the risk of the purchaser as soon as sold, but it shall be the obligation of the seller to see that animals are fed and cared for until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner. After 48 hours a maintenance fee of \$5.00 per day will be assessed until pickup, unless AMS arranges shipment.

### **Certificate of Registry**

A transferred certificate of registry will be furnished to the purchaser for each registered bull or registered female once proper settlement has been made.

### **Health**

Health papers suitable for interstate shipment will be furnished on all animals.

### **Announcements**

Any changes from the information of any kind in this catalog will be provided in a sale day supplement sheet or announced from the auction block and such information shall take precedence over cataloged information.

### **Breeding Guarantee**

1. All animals are guaranteed to be breeders with the exception of: a) calves under 12 months of age; b) animals shown by purchaser after sale in which the guarantee (if any) shall be between the seller and the buyer; c) injury or disease occurring after the sale; d) gross negligence or willful misconduct on the part of the purchaser; e) death by any reason.
2. Any bull which settles cows by natural service and passes a fertility test made by competent veterinarians, mutually agreed upon by the buyer and seller, during any six month period of trial (provided for in paragraph 2 of the section of these sales terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder. All partial interest bulls are guaranteed to produce freezeable quality semen.
3. Safe in calf females have been examined by competent personnel and are so guaranteed.
4. Exposed females have been exposed but are not guaranteed to be safe in calf.
5. Open females have not been served and are so guaranteed.

### **Pregnancy Determination**

The females in this sale noted safe in calf have been determined pregnant by physical palpation. Our best estimate of service sire will be given in the case of the females with both an A.I. sire and a natural breeding sire.

### **Options and Privileges of Return or Adjustment**

1. All claims for adjustment or refund must be made in writing within six months of the sale date.
2. In the event an animal is claimed to be a non-breeder, the animal may be returned to the seller if in good condition and complying with the health requirements of Texas. The seller shall be entitled to a six month trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months the seller is unable to prove the animal is a breeder, the seller shall at the option of the buyer replace the animal with another of equal value or issue a credit for the initial selling price. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation.
3. If a bull is sold and at a later date proves not to be eligible for registration under association rules, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer, refund the purchase price or issue a credit for the initial selling price upon the return of the animal to the farm of the seller.
4. If an animal is sold and through DNA is proven to have incorrect parentage as represented by the certificate of registration, and for which the parentage can be determined, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer, refund the purchase price or issue a credit for the initial selling price upon the return of the animal to the farm of the seller.

### **Rights and Obligations**

1. The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding on both. Other than the guarantees and warranties stated above, no other warranties or guarantees are expressed or implied. Each sale or resale of an animal constitutes a separate transaction.
2. American Marketing Service or any other person connected with the management of the sale assumes no liability, legal or otherwise.

# You drive, we'll help steer

As a local cooperative, we share our profits with the Texans we serve. Since 2006, we've returned almost \$2 billion in combined cash and allocated equities to our members through our cooperative returns program. So, when you're ready to expand or enhance your ranching operation, try a partnership that really pays. **Together we're better.**

**VICTORIA 361.582.9500**

 **NMLS493828 | [capitalfarmcredit.com](http://capitalfarmcredit.com)**

*Cooperia* (shown here) is one of the most prevalent internal parasites in U.S. cattle herds. And infected calves experience 7.4% less average daily gain.<sup>1</sup>

**DON'T LET  
MICROSCOPIC  
MONSTERS  
BITE YOUR BOTTOM LINE**

**Add Safe-Guard® (fenbendazole) when you deworm to take out the profit-eating parasites that your ivermectin alone just can't.<sup>2</sup>**

If you've only been using ivermectin (or any other kind of -ectin), it's time to add a dewormer from a different class to your protocol. Because you're leaving resistant parasites in your cattle – and potential profit on the table. By adding Safe-Guard, you can kill more of those microscopic monsters than you could with ivermectin alone.<sup>3</sup>

This different-class dewormer is one more way Merck Animal Health Works for you.

**BITE BACK AT SAFEGUARDWORKS.COM**

**IMPORTANT SAFETY INFORMATION | RESIDUE WARNINGS:** Safe-Guard Paste and Suspension; cattle must not be slaughtered within 8 days following last treatment; Mineral and feed through products: 13 days; EN-PRO-AL Molasses Block: 11 days; Protein Block: 16 days; For dairy cattle, the milk discard time is zero hours. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal. For complete information, refer to the product label.
