SALACOA VALLEY FARMS
Fall 2021

— BULL & FEMALE SALE —

S
V
F

November 19-20, 2021
FAIRMOUNT, GEORGIA

Welcome to "The Source"

The Salacoa Valley Farms Team and family would like to welcome you to our ranch. We are extremely proud of this year's offering. The power in both the bulls and cattle offering is some of the best in the breed and will add value to any herd.

We are excited to bring the "Peaches" offering back this year. These amazing heifers were hand picked to bring you the quality of genetics you are seeking. We have also added commercial heifers sired by and bred to SVF bulls this year. As always, the SVF Team has worked hard to make sure you get the cattle you deserve and desire.

We invite you to join us at Salacoa Valley for this great sale. Registered Cattle will sell Friday, November 19th along with the Peaches. Registered Bulls sell Saturday, November 20th. Friday night will be dinner along with entertainment, so make plans to come early.

We welcome you to the ranch, and remember, we are cattle people serving cattle people.

Todd Harvey
General Manager
Salacoa Valley Farms

Schedule of Events

FRIDAY, NOVEMBER 19, 2021

- All Day Cattle available for viewing
- Noon Burgers by the SVF Crew with SVF Beef
- 4:00 PM Salacoa Valley Brangus 'The Source' Female Sale
Immediately following the sale - Salacoa Valley Awards Recognition
- 6:30 PM Brisket dinner with all the fixin's
Special entertainment featuring **Gypsy Outfit**, Cartersville, GA

SATURDAY, NOVEMBER 20, 2021

- 8:00 AM Cowboy coffee and cattle available for viewing
- 10:00 AM Salacoa Valley Bull Sale
Selling 200+ Bulls
Build-Your-Own Taco Bar immediately following the bull sale

**All times listed are Eastern Standard Time.*

Sight Unseen Purchase Option

If you are unable to attend the auction in person or watch DV Auctions Internet Broadcast, simply contact the AMS marketing team or the Salacoa Valley Farms management team or the management team at The Seminole Tribe Inc.

- Describe your selection criteria and the type of bull(s) you wish to purchase and your price range.
- You pay only the bid price, just as if you were bidding in person.
- We will call after the sale to confirm your purchase and you can confirm your payment method and arrange shipping.
- You decide if the animal meets your criteria upon delivery. If you are not happy with your purchase, you don't own it.
- It is as simple as that. 100% satisfaction guaranteed!

2021 Salacoa Valley Farms Consignors

We are proud of our fellow breeders and friends who have chosen to participate with us as cooperators in marketing their bulls through the Salacoa Valley program. Many have been with us from the beginning and we appreciate your loyalty. We invite anyone having an interest in participating with us to sit down with Todd Harvey or Josh Brooks and discuss our parameters and requirements and the opportunities that are present. We particularly invite the purchasers of our Fall Bull Calf pairs to discuss way we might assist in marketing as we believe these are some of the best bull calves we have made.

DVAuction

Broadcasting Real-Time Auctions

Real time bidding & proxy bidding available.

Can't make the sale? Bid from home with DV Auction's "real-time" internet bidding service!

Buying online is as easy as 1, 2, 3...

1. Create an account at www.dvauction.com under the "register" tab
2. Apply for bidding approval by clicking on the "details" tab at least 24 hours prior to the auction-a DV representative will notify you once you have been approved
3. Tune in for the sale and make your purchases!

After the sale, contact the sale manager or owner to arrange transportation and payment. **High speed internet** is required for successful bidding-be sure to check the lag-time monitor in the top left corner to ensure real-time broadcasts.

Proxy Bidding-if you can't make time to watch the sale, register a proxy bid and let our system represent your bid while you're away. Look for the "proxy bid" tab on the auction listing, and fill in your maximum bids. We'll handle the rest!

Having troubles? During the auction, you can type a message to the operator at any time for assistance. Our full-time support team can also always be reached at (402) 474-5557.

From the Herd's Veterinarian

Welcome...

to the Fall 2021 Salacoa Valley Sale. My name is Dr. Berry and I am the herd veterinarian for Salacoa Valley and this Fall sale veterinarian. Salacoa employs a very capable and knowledgeable group of cattlemen. These cattlemen are very particular about biosecurity and herd health which lends to cattle that are disease and problem free and ensures that buyers can purchase with confidence in the quality of the livestock.

Vaccination protocols are central to the herd health program here at Salacoa. The protocol consists of modified live vaccines against IBR, PI3, BRSV, BVD, 5-way Lepto, and Vibrio (Campylobacter). Also utilized is an 8-way clostridial vaccine. Cattle are also dewormed regularly and dewormers are rotated to prevent parasite resistance. A high-quality mineral mix is also provided at all times.

All bulls that are to be sold today have passed a semen quality check and breeding soundness exam as outlined by the Society for Theriogenology. All bulls have also been screened for Tritrichomonas and have tested negative by both culture and PCR. Tests were performed at the Auburn University Diagnostic Laboratory in Auburn, Alabama.

Interstate health papers will also be provided on all sold cattle. These can be picked up at the conclusion of the sale. I will also be available on sale day for any questions you may have about Salacoa Valley's herd health program.

Sincerely,

Dr. Bill Berry

Berry Animal Clinic
Piedmont, AL | 256.447.6318

*CALVES

1st Working – 3-4 weeks preweaning

Vista Once SQ

- Vista: IBR, BVD type 1 & 2, PI3, BRSV
- Once: Pasteurella (Mannheimia Haemolytica, Pasteurella Multocida)
- Mix Contents using a transfer needle, swirl gently to mix, administer 2ML of vaccine per head SUB Q, use all contents at time when mixed, discard any remaining product. Must use within 1-2 hours of mixing.

Cavalry 9

- 7-Way Black Leg & Tetani-Perfringens Types C & D
- Swirl vaccine bottle before use, administer 2ML of vaccine per head SUB Q

Piliguard Pinkeye-1 Trivalent

- Vaccine against pinkeye associated with Moraxella Bovis
- Swirl vaccine bottle before use, administer 2ML of vaccine per head SUB Q

PI Test +/-

Combination deworm with Safe-Guard & Injectable dewormer

2nd Working – at weaning

Vista 5 VLS SQ

- Vista: IBR, BVD type 1 & 2, PI3, BRSV
- VLS: Vibrio, 5-way Lepto
- Mix Contents using a transfer needle, swirl gently to mix, administer 2ML of vaccine per head SUB Q, use all contents at time when mixed, discard any remaining product. Must use within 1-2 hours of mixing.

Cavalry 9

Refer to directions above
Deworm with Safe-Guard & Prohibit (Levamisole)

3rd Working – Yearling Heifers & Bulls (11-13 months) when scanning

Vista 5 VLS

- Refer to directions above

Cavalry 9

Refer to directions above
Combination deworm with Safe-Guard & Pour-on dewormer

*BREEDING HEIFERS

When CIDRs are placed

Vista 5 VLS SQ (booster) at ultrasound or 30 days out

- Refer to directions above

*SALE BULLS

30 days prior to sale

Vista 5 VLS SQ

- Refer to directions above

Piliguard Pinkeye-1 Trivalent

- Refer to directions above

Cavalry 9

- Refer to directions above

Combination deworm with Safe-Guard, injectable dewormer, & pour with Ultra Saber for lice and fly control

*COWS

Prebreeding 30 days

Vista 5 VLS SQ

- Refer to directions above

Safeguard

- 2.3ML per 100LBS of body weight

Combination deworming with Safeguard and Ivermectin INJ

Mid-Gestation-Pregnancy Check

VLS SQ

- VLS: Vibrio, 5-Way Lepto

- Shake vaccine bottle before use, administer 2ML of vaccine per head SUB Q

Cavalry 9

- Refer to directions above

ADDITIONAL INFORMATION & PRODUCT DESCRIPTION

Vista Once - One dose 5-way MLV vaccine with avirulent live Pasteurella Multocida & Mannheimia Haemolytica

Vista 5 VLS - One dose MLV vaccine with one dose vibrio & 5-way lepto with L. Hardjo protection

VLS SQ - Vibrio/5-way lepto with L. Hardjo protection.

Cavalry 9 - Blackleg protection with Tetani-Perfringens Type C&D

Piliguard Pinkeye - 1 Trivalent- Vaccine against pinkeye associated with Moraxella Bovis

The Science of Healthier Animals™

Genomically Enhanced EPDs

All the bulls in this offering have had DNA profiles run and those genetic codes have been incorporated into the EPD values represented on the bulls in this offering. This information contributes greatly to the accuracy of the EPD values presented.

The whole goal in performance measurements, whether the reported values are weights and ratios or EPDs, is to reflect as accurately as possible the differences in a herd bull's ability to add the traits you are looking for to your cow herd. Contemporary groupings, ratios and EPDs are all an attempt to neutralize environmental effects on the numbers presented. DNA allows us to go the next step in identifying true genetic value at a much younger age than ever before possible. With genomically

enhanced EPDs, a young virgin bull with no progeny can produce accuracy figures equal to a sire with 10 to 12 calves.

As commercial cattlemen and consumers of seedstock, we have never had performance values that as accurately predict the final outcome on our operations as we currently do, and after all isn't that what you really want? We invite you to take advantage of our herd sire selections and of the pressure we have put on these bulls to perform under real world conditions, and to enjoy the complete data profile of each individual in this sale. Join us November 20th and 21st at the ranch at 10:00 AM and see our progress.

New Selection Indexes & Maternal EPDs

IBBA's release of selection indexes and maternal EPDs puts more tools into the hands of commercial producers in making bull selections. Most commercial producers are trying to find the balanced bull. They want a bull that can produce decent market steers that have high weaning weights, have high marbling scores leading to decent quality grades, but at the same time don't have calving ease problems or too much fat on the carcass. This balancing act is constantly managed by bull buyers as they look across the previously available EPDs. However, typical bull buyers also want this same bull to produce heifers that can go back into the herd as replacements. These heifers must be able to breed as yearlings, have the calf unassisted, then continue producing calves for several years with minimal inputs. They typically must have moderate sizes to fit the harsh environments that Brangus cattle are expected to perform in. While producing good market steers is important, the heifer side of the equation is roughly more than twice as important economically. Cows that fail their first year or two, or that require high inputs to perform, are very costly to an operation.

To address the maternal side of this equation, IBBA has released three new EPDs. The Mature Cow Weight EPD is a prediction of how much an animal's daughters will weigh as a five-year-old versus the average of the breed. The Stayability EPD predicts the likelihood an animal's daughters will still be in the herd at six years old versus the average of the breed. The Heifer Pregnancy EPD predicts the probability that an animal's offspring will breed and have a calf as a two-year-old. Heifer pregnancy and stayability have direct impacts on the economics of commercial cow/calf operations. Females that do not breed as yearlings and cannot remain as productive cows are costly to an operation. While mature weight is not as directly related to returns, it is correlated to a cow's ability to thrive in a commercial setting and continue producing calves. Larger cows have higher nutritional needs and often cannot produce in commercial settings without supplementation. This is especially true in harsh environments, a place where Brangus cattle thrive as a breed. Therefore, the goal with the mature cow weight EPD should be selecting a moderate cow that is not too large.

Balance is the key to any selection program. We often want to maximize certain traits, such as weight or marbling, without realizing that there are consequences to this maximization. To help create this balance, selection indexes combine many traits into a single number. Weighing the costs and benefits in selecting for or against certain traits is done systematically by statistical modeling. This allows the bull buyer to not have to perform this complex weighting on the back of an envelope or in his head at a bull sale. This single number allows a buyer to confidently select the balanced bull for a particular set of traits.

IBBA has released two selection indexes. The first is a fertility selection index that combines heifer pregnancy, stayability, the age a cow will first calve, mature cow weight, and back fat EPDs into a single number. The second is a growth index that combines birth weight, weaning weight, milk production, post wean gain, ribeye area, marbling, and back fat EPDs into a single number. These indexes are expressed as standard deviations from the breed average, meaning that bulls with a +2 index are two standard deviations above the average. For both indexes, higher numbers are superior. As a point of reference, 95% of the population will be between -2 and +2 standard deviations of the mean. This infers that only 2.5% of the animals will be worse than a -2 for an index, and only 2.5% of the animals will be greater than a +2 index. The bottom line is that animals with an index value above 2 are very good animals for the traits being considered.

These additional tools of maternal EPDs and selection indexes give bull buyers the ability to more confidently make purchase decisions based on sound data. As buyers adopt these tools and use them in purchases, they will see the difference in the economics of their cow herds.

All EPDs and footnotes in the Brangus bulls are based off of the October 2021 International Brangus Breeders Association (IBBA) EPD run. IBBA updates EPDs and percentiles on a monthly basis (please visit www.gobrangus.com for the most up to date information).

The Peaches

We are delighted to once again be able to invite our friends and genetic partners to participate in The Peaches portion of our annual production sale. You will find some of the most powerful females from many of the leading genetic suppliers in the Southeast in this portion of the sale. They represent cutting edge genetics backed by sound and proven females throughout the offering. Most pleasing to us is the fact that many of the dams represented in these Peaches came through this very sale in the past as 6-year-olds. Take a good look at these young donor prospects as they will leadoff the female sale on Friday afternoon. We hope to see you there.

Georgia Peach

Lot 1

VF Mcs Broadway 000H16

Lot 2

VF Mcs Broadway 000H18

These 2 donor prospects come from VF favorite 000 tribe that starts with the great grand dam MC Ms Quite Lady 000S50 that has done so much for the Brangus breed and Vanna Farms. This fall marks the first ever females offered out of VF favorite young donor VF Ms Chill Factor 000D3. These docile females are sired by one the hottest young herd sires in the breed, T3 Broadway 30E, that sold for \$67,500 at Salacoa Farms. Broadway is out of the proven herd sire Hollywood and the hot 30 cow family MS Salacoa Atlanta 30B5, the dam of the \$64,000, 30D donor. These 2 donor prospects write 11 EPD traits ranking in the breed's top 35% or greater led by top 3% Terminal Index, 4% WW and IMF, 10% Fertility Index, REA and YW. Imagine all this power and breed average CED and BW to top it off. Their brothers also sell in the bull offering.

She is sired by Never Surrender and paternal sibs have generated over \$800,000 in revenue. Her dam is 23Y66, the recent purchase of Phillips ranch in QVF's June Elite sale for \$12,000. She has generated over \$100,000 in her lifetime with more to come. She is a full sister to the 23F11 sold for \$14,000 in the 2020 Genetic Edge sale. She boasts 9 EPD traits ranking in the breed's top 25% or greater led by top 1% REA, 5% WW, 10% YW and Terminal Index, 20% IMF and top 25% Fertility Index.

This big bodied perfect structured Never Surrender daughter is one of the youngest peaches. We appreciate her flawless design and depth of rib and big top. We have 5 full sisters or we would never let her go. To give you an idea of how good her dam is, T3 bought her last fall. She records 11 balanced and highly antagonistic EPD traits ranking in the breed's top 35% or greater led by top 1% REA, 2% WW and YW, 3% Terminal and 5% Fertility Index with a whopping 10% Milk and 25% IMF EPD all with only 2.1 lbs. of BW.

Briggs Never Surrender 541H

She is a full sister to Unconquered, the lead off yearling bull in this sale. Like him, she is moderate in kind, deep sided and deep flanked, stands on a world of bone with plenty of top and power. She is super attractive. Sired by Never Surrender, her paternal sibs have generated over \$800,000 in revenue. Her dam was our choice along with Salacoa Valley and Harris Riverbend in the 2016 Genetix sale. We thought she was the most powerful bred heifer in the offering. Two maternal brothers by Strategy have averaged \$12,000 and a full brother sold for \$9,500 at Briggs Ranch in 2019. She writes 9 EPD traits ranking in the breed's top 15% led by top 1% WW, YW, REA and Terminal Index, 10% Fertility Index and top 15% IMF and +10 Milk.

This powerful Atlanta daughter combines Hard Rock, Jethro and the iconic donor 468G15. Her donor dam earned her way into our ET program. We have 4 full sisters born on 2018 and put this embryo in because they are good. We think you will appreciate her quality and power as much as we do. We also love her EPD combinations with 9 traits ranking in the breed's top 35% or greater paced by top 5% Fertility Index and IMF, 10% REA, 15% Terminal Index, 20% WW and 30% YW. She is also below breed average for BW.

The Source

As we do every year at Salacoa Valley, we are selling all the 6-year-old cows. Nothing is held back; we are selling all the donors and herd cows born in 2015 who are pregnant or with a calf at side. They are in the prime of their life.

Why would we sell these prime productive cows? Our reasons are simple. First, they are “The Source” of today’s powerful SVF cowherd and we want to offer a product that benefits our customers. Judging from some of our customers, their returns have come in spades. Secondly, we feel we have had the opportunity to capture their genetics in our herd with 4 calves, or more if we have used them as a donor, and it is time to share their genetics and allow them to build our customers herds as they have built ours. The third reason and maybe the most important, we can’t keep them all. If we want to retain the replacement females in our herd out of these productive proven cows, we have to sell something or buy more land. We decided to offer prime value in a proven package with stable EPDs. We are selling the cattle that have built Salacoa Valley into the herd it is today.

Remember last year, we sold the A and B model cows. They were born in 2013 and 2014 and we had just purchased Stonewall as a 4-year-old. Atlanta became a year old in the spring of 2013 and New Vision was a 2-year-old. The C model cows represent the second and third seasons we had used all three bulls in our herd and guess what? We had learned a lot about breeding these Salacoa Valley Breeding Cornerstones. The C model cows represent a refinement of our breeding scheme and we think they are some of the best New Vision, Stonewall and Atlanta daughters ever created.

We know for sure Atlanta and Stonewall are two of the most balanced bulls in Brangus and we were fortunate enough to breed one of them and buy the other. In addition, we were fortunate enough to raise and identify Salacoa New Vision 209Y2 as a genetic piece of the puzzle we wished to incorporate into our program. Few bulls can match his shear muscle and REA, soundness and phenotype. Never have any three bulls in the span of a year and a half, had a bigger impact in force, than New Vision, Atlanta and Stonewall have had at Salacoa Valley, and the breed. These C model cows represent the beginning of their most profound influence and it remains through these daughters we are selling.

We have mated the cattle as if we are keeping them and hope you are as happy with the results as we know we would be. You will find Empower, Perfect Fit, Never Surrender, Atlanta, Strategy, and Big Town in their matings. We think these sire choices give us an advantage in the next generation.

We hope you will join us at 4 PM Friday November 19 when we sell all of our breed leading proven 6-year-old cows with heifer calves at side and bred to the breed’s leading and cutting-edge bulls. They are capable of building your program, just as they have built ours. Please give them a try.

The Complete Dispersal of the L28 Brangus Herd

Joe Frank is the owner of the L28 cow herd running at Salacoa Valley. He owns commercial cattle in Florida but decided to get in the registered Brangus business several years ago. His cattle have been managed right along with ours here at Salacoa Valley with his good bull calves marketed through the SVF bull sales. He has retained the top end of his replacement females every year. The time has come for L28 to disperse the cow herd and we are doing so in this sale. All his females sell with nothing held back. Take a look at these productive females. They will sell Friday November 19th.

She is the kind we like, picture perfect phenotypically and very powerful numerically. She is sired by a Never Surrender son and projects calving ease with big growth, Milk and carcass.

Lot 41 - Ms Salacoa Top Product 209C5

Sells open and ready to flush

She is the big bodied, clean made UB1 donor sired by Sitz Top Product. Her dam is a Lambert daughter out of the iconic donor 209L11 and a full or maternal sib to New Vision, Swift, J Edgar Hoover, Statesboro and a host of other AI sires within the Brangus breed. 209C5 produced a Never Surrender daughter that sold to Quail Valley for \$15,000 and another to Fenco for \$14,000 and another Never Surrender son last fall to Herndon Farms for \$10,000. She has sons in this bull sale also. She writes EPDs ranking in the breed's top 5% IMF, 15% Terminal Index, 25% WW and REA, 30% YW and Fertility Index and top 35% BW. She is tailor made for Never Surrender, his sons and many of the power bulls within the breed.

All EPDs and footnotes in the Santa Gertrudis bulls are based off of the October 2021 Santa Gertrudis Breeders International (SGBI) EPD run. SGBI updates EPDs and percentiles on a monthly basis (please visit www.santagertrudis.com for the most up to date information).

Our Beef Bulls Developed with Longevity in Mind

We have dug deeper and culled harder in an effort to bring you an elite set of Brangus and Santa Gertrudis bulls here at Salacoa Valley. We hope you will enjoy sorting through these bulls as much as we have enjoyed watching them grow up and develop into the kind they are today.

We have more top end range bulls than ever before and we feel the uniformity in the offering is unmatched. We also have a top end set of herd bulls that can move a variety of programs along their chosen path. They are big footed, structurally sound bulls with more muscle. They come in a user-friendly package and have been developed in large grass traps featuring 100 feet elevation changes. They are capable of traveling the country and covering your cows.

We are reporting all performance values as genomically enhanced EPDs. We are completely convinced that both you as our customers and we as seedstock producers will make the most genetic progress in our herds through our reliance on these values in making our herd sire selections.

All of these bulls are from the top cut. We designate these bulls for the sale at yearling time and as always, have allowed no one to purchase any bulls out of this offering. This is also true for the November and December yearlings designated for sale in the spring at Briggs Ranch. You deserve the best.

These bulls were developed with their longevity in mind. We know our EPDs say that very few bulls in the breed can match the performance bred into this cow herd and the bulls represented in this offering. We feel an obligation to our customers to provide well conditioned herd sires for their registered and commercial operations that will not melt when they are turned out and won't break down in their joints because of the stress of getting too fat just to satisfy an adjusted yearling weight and adj REA contest. These sale bulls average less than .25 ADJ fat at the time of scan, just right in our opinion.

We will always make available to our customers complete and true data sets that will allow selection decisions to be made based on the complete picture. If you desire more data please contact us and we will be happy to oblige.

We hope you will join us November 19th and 20th at Salacoa Valley Farms. We think you will find an exceptional set of beef bulls.

Modelo big bodied, moderate styled herd sire prospect is a Big Town son. Big Town sons sold for \$160,000, \$50,000, \$26,000 and \$23,500 last spring at Mound Creek. His dam is a Hollywood daughter we purchased at TBBA 2 years ago and her donor dam is the \$18,000, 129X2 cow Star G purchased in Houston. He is numerically blessed writing 11 EPD traits ranking in the breed's top 35% or greater. He boasts top 10% REA and Terminal Index, 15% WW, YW and IMF, 20% Milk and top 30% Fertility Index. Yet with all that power, he comes in near breed average BW and top 40% CED.

He is a maternal brother to the \$80,000, 23H and the \$18,000, 23H5 that sold in Quail Valley's Elite sale last June. His sire is Never Surrender who is responsible for over \$800,000 in progeny sales here and at Quail Valley. He is a power bull in a wide bodied, big topped, moderate style. He records 10 EPD traits ranking in the breed's top 35% or greater with top 1% WW, YW and REA. He scanned over a 16" REA. He also boasts top 4% Terminal Index, 20% Fertility Index, 35% IMF with above breed average Milk. His maternal granddam is a Stonewall daughter.

Selling 1/2 semen interest and full possession.

Unconquered is moderate in his kind, deep sided and deep flanked, stands on a world of bone with plenty of top and power. He is super attractive. He is sired by Never Surrender and his paternal sibs have generated over \$800,000 in revenue. His dam was our choice along with Briggs Ranch and Harris Riverbend in the 2016 Genetix sale. We thought she was the most powerful bred heifer in the offering. Two maternal brothers by Strategy have averaged \$12,000 and a full brother sold for \$9,500 at Biggs Ranch in 2019. None were as good as this prospect. He posts 10 EPD traits ranking in the breed's top 35% led by top 2% WW, YW and REA, 3% Terminal Index, 15% Fertility Index, 30% Milk, 25% IMF with only 2.4 lbs. of BW and breed average CED.

Lot 154
T3 Never Surrender 535H33

He is another big bodied Never Surrender son. He has a world of rib and flank and is super sound from any dimension. His Stonewall dam was our choice of the bred heifers from the Calyx Star dispersal and goes back to 535N60 on the bottom side of her pedigree. He posts 11 EPD traits ranking in the breed's top 35% or greater paced by top 1% REA, 10% Fertility Indes, 15% Terminal Index and YW and top 25% IMF.

Semen Special

Get your semen orders filled at the Salacoa Valley sale. We will bring the semen to the sale site and you will take delivery there, saving shipping cost. As an added bonus, we will offer our buy 20 get 5 free special. This offer only applies to semen delivered to the sale site. **Contact AMS on or before 11/11/21 to be eligible for this special offer.**

Terms & Conditions

Bidding

Each animal will be sold to the highest bidder without reserve. The auctioneer will settle any disputes as to bids and his decision on such matters shall be final.

Terms

Each animal becomes the risk of the purchaser as soon as sold, but it shall be the obligation of the seller to see that animals are fed and cared for until loaded for shipment or until the expiration of 48 hours after the sale, whichever occurs sooner. After 48 hours a maintenance fee of \$5.00 per day will be assessed until pickup, unless AMS arranges shipment.

Sight Unseen Purchases

Buyers may purchase bulls through American Marketing Service or Salacoa Valley personnel at auction without viewing the cattle. For sight unseen purchases, the buyer has the right of inspection at the time of delivery. If the animal is deemed unsatisfactory, it may be reloaded on the delivery truck and returned to the farm of the seller at no obligation to the buyer. All transportation expenses will be the responsibility of the seller. If the animal is deemed unsatisfactory within one week of the purchase, the buyer may at their expense, return the animal to the farm of the seller for a full refund of the purchase price.

Certificate of Registry

A transferred certificate of registry will be furnished to the purchaser for each registered animal once proper settlement has been made.

Health

Health papers suitable for interstate

shipment will be furnished on all animals.

Genetic Conditions

Unless otherwise noted, all cattle selling are DDF either through testing or pedigree. Any DDC or DDPC cattle are so noted.

Announcements

Any changes from the information of any kind in this catalog will be provided in a sale day supplement sheet or announced from the auction block and such information shall take precedence over cataloged information.

Breeding Guarantee

1. All animals are guaranteed to be breeders with the exception of: a) calves under 12 months of age; b) animals shown by purchaser after sale in which the guarantee (if any) shall be between the seller and the buyer; c) injury or disease occurring after the sale; d) gross negligence or willful misconduct on the part of the purchaser; e) death by any reason.

2. Any bull which settles cows by natural service and passes a fertility test made by competent veterinarians, mutually agreed upon by the buyer and seller, during any six month period of trial (provided for in paragraph 2 of the section of these sales terms and conditions entitled "Options and Privileges of Return or Adjustment") shall be considered a breeder. All partial interest bulls are guaranteed to produce freezable quality semen.

3. Safe in calf females have been examined by competent personnel and are so guaranteed.

4. Exposed females have been exposed but are not guaranteed to be safe in

calf.

5. Open females have not been served and are so guaranteed.

6. Donor Females. a) A female is not guaranteed to be a breeder after the date of the sale when that female is to be used or attempted to be used, in an embryo transfer program, unless by separate agreement between the buyer and seller. b) Embryo transfer guarantee. Even though it is possible some of the female lots have worked successfully in our embryo transfer program in the past, and should in the future, there is no guarantee or warranty on future embryo production of any lot. Flush records are available upon request.

Pregnancy Determination

The registered females in this sale noted safe in calf have been determined pregnant by physical palpation or ultrasound technology. Our best estimate of service sire will be given in the case of the females with both an A.I. sire and a natural breeding sire. Keep in mind this is our best estimate.

Options and Privileges of Return or Adjustment

1. All claims for adjustment or refund must be made in writing within six months of the sale date.

2. In the event an animal is claimed to be a non-breeder, the animal may be returned to Salacoa Valley Farms if in good condition and complying with the health requirements of Georgia. The seller shall be entitled to a six month trial following the return of the animal in which to prove that the animal is a breeder. If at the end of six months the seller is unable to prove the animal is a breeder, the seller shall at the option

of the buyer replace the animal with another of equal value or issue a credit for the initial selling price. If the seller proves the animal to be a breeder, it shall be the obligation of the purchaser to take delivery of the animal and pay all expenses incurred for transportation.

3. If an animal is sold and at a later date proves not to be eligible for registration under association rules, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer, refund the purchase price or issue a credit for the initial selling price upon the return of the animal to the farm of the seller.

4. If an animal is sold and through DNA is proven to have incorrect parentage as represented by the certificate of registration, and for which the parentage can be determined, the seller shall be obligated to make a satisfactory adjustment on the purchase price to the buyer, refund the purchase price or issue a credit for the initial selling price upon the return of the animal to the farm of the seller.

Rights and Obligations

1. The above terms and conditions of sale shall constitute a contract between the buyer and seller of each animal and shall be equally binding on both. Other than the guarantees and warranties stated above, no other warranties or guarantees are expressed or implied. Each sale or resale of an animal constitutes a separate transaction.

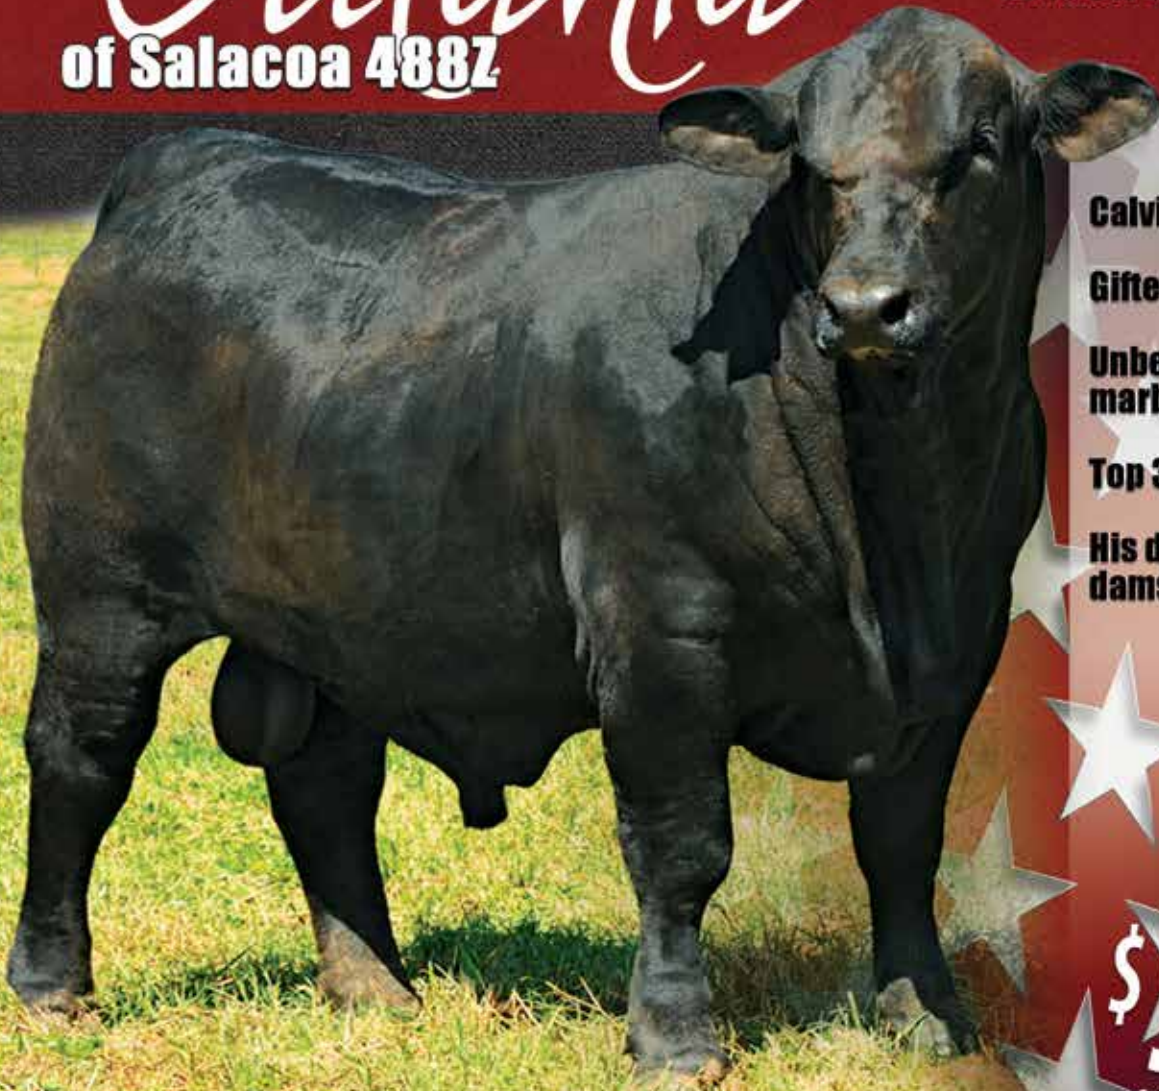

2. American Marketing Service or any other person connected with the management of the sale assumes no liability, legal or otherwise.

Purina® All Seasons Cattle Nutrition™

FEED GREATNESS®

LEE UNDERWOOD
423-368-7653
lunderwood@agcentral.coop

Nematodirus (shown here), also known as the thread-necked intestinal worm, is an unsightly parasite that causes infections marked by diarrhea and loss of appetite – both of which open the door for other internal parasites to cause even more damage.

**DON'T LET
MONSTROUS
PARASITES
BITE YOUR BOTTOM LINE**

Choose Safe-Guard® (fenbendazole) when you deworm to take out more profit-eating parasites.

SAFE-GUARD is proven to kill 98.7% of worms, remaining powerful and effective, even in the face of parasite resistance.¹ Choosing two dewormers from two different classes (like SAFE-GUARD + ivermectin) can help ensure you're getting the toughest parasites – and helping slow the growing issue of parasite resistance.

BITE BACK AT KILLMOREWORMS.COM

IMPORTANT SAFETY INFORMATION | RESIDUE WARNINGS: SAFE-GUARD Paste and Suspension: cattle must not be slaughtered within 8 days following last treatment; Mineral and medicated feed products: 13 days; EN-PRO-AL Molasses Block: 11 days; Protein Block: 16 days; For dairy cattle, the milk discard time is zero hours. A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal. For complete information, refer to the product label.

¹Reinhardt CD, et al. A fenbendazole oral drench in addition to an ivermectin pour-on reduces parasite burden and improves feedlot and carcass performance of finishing heifers compared with endectocides alone. *J Anim Sci.* 2006;84(8):2243-50.
